Start of Block: consent form

consent **Consent Form**

Purpose of the study

This study is conducted by researchers at the University of Vienna and the University of Copenhagen. We aim to understand how people make and evaluate decisions in different social situations.

Procedure

You will follow the instructions in this survey and respond accordingly. The estimated duration of this study has been indicated on the online platform from which you started this study.

Potential risks

This study involves no known risks greater than those of ordinary daily life.

Potential benefits

This study aims to add to existing research in the fields of social psychology and behavioral science. We also hope that this study can provide you with an experience of participating in psychological research and possibly help you learn more about yourself, including your beliefs, evaluations, preferences, etc.

Compensation

Your compensation will be offered through Prolific. It will include a fixed guaranteed participation fee that is paid only if you complete the entire study and a bonus payment. The amount of this bonus depends on your responses.

Confidentiality

The data collected for the study will be shared with other researchers for research-only purposes after all personal identifiers are removed. Your responses will be anonymous in the dataset.

Participation and withdrawal

Your participation is voluntary. This means that you can choose to stop at any time without negative consequences other than affecting your compensation.

Questions and concerns

If you have any questions or concerns about the research, please contact Qinyu Xiao at the University of Vienna (qinyu.xiao@univie.ac.at).

consent_agree Please indicate whether you have read and understood the above and whether you agree to participate.

- ○ I have read and understood the above. I agree to participate in this study. (1)
- ○ I do not agree to participate in this study. (2)

End of Block: consent form

Start of Block: Prolific ID

pid What is your Prolific ID?

Please note that this response should auto-fill with the correct ID.

_____

End of Block: Prolific ID

Start of Block: general introduction

general_intro During this study, you will have 3 opportunities to earn a bonus payment. How much you earn depends on how you respond. Therefore, please pay close attention to the instructions.

After the study is over, **one of the 3 bonuses will be randomly chosen for payout**. You will receive the bonus via Prolific a few days after completing the study.

Please also keep in mind that around 500 participants will take part in this study.

We emphasize that this study provides no false or misleading information.

- ☐ I have read and understood the above. (1)

End of Block: general introduction

Start of Block: mind game intro

game_desc **This is the first opportunity to earn a bonus payment.**

The task

You will be asked to think of a whole number between 1 and 5 (i.e., 1, 2, 3, 4, or 5) and keep it in your mind. After that, you will go to an external website. The website will show you a number from 1 to 5 that it picks randomly. All you need to do is indicate whether the number the website shows is the same as the one you thought of.

If you say that the number you kept in mind is the same as the number displayed, we call this **reporting a match**.

Display This Question:

If condition = baseline

base_pay **The payment**

If you report a match, you receive 1.2 GBP from this task. If you do not report a match, you receive 0.2 GBP.

Display This Question:

If condition = cp

cp_pay **The payment**

If you report a match, you receive 1.4 GBP from this task. If you do not report a match, you receive 0.2 GBP.

Given the nature of the task, it is very unlikely that out of 500 participants, more than 25% (that is, 125 out of 500) will obtain a match. If more than 25% report a match, this is likely due to some participants reporting a match when they did not obtain one. In this case, we will reduce the payment for all participants, irrespective of whether a match is reported. **In particular, if more than 25% of participants report a match, all participants will lose 0.2 GBP.** That is, in this case, if you report a match, you receive 1.2 GBP; if you do not report a match, you receive 0 GBP.

Display This Question:

If condition = norm

norm_pay **The payment**

If you report a match, you receive 1.4 GBP from this task. If you do not report a match, you

receive 0.2 GBP.

Given the nature of the task, it is very unlikely that out of 500 participants, more than 25% (that is, 125 out of 500) will obtain a match. If more than 25% report a match, this is likely due to some participants reporting a match when they did not obtain one.

start_compre Please answer the following questions to help us ensure that you understand the task.

*

compre_1 Those who report a match can receive a larger bonus for this task than those who do not.

- True (1)
- False (2)

Display This Question:

If condition = cp

Or condition = norm

*

compre_2 It is fairly unlikely that more than 25% of participants (that is, 125 out of 500) will obtain a match just by chance.

- True (1)
- False (2)

Display This Question:

If condition = baseline

Or condition = norm

*

compre_3F My bonus will be negatively affected if too many others report a match, regardless of whether I report a match or not.

- True (1)
- False (2)

Display This Question:

If condition = cp

compre_3T My bonus will be negatively affected if too many others report a match, regardless of whether I report a match or not.

- True (1)
- False (2)

Display This Question:

If condition = cp

compre_4 All participants can lose some bonus if too many participants report a match.

- True (1)
- False (2)

End of Block: mind game intro

Start of Block: mind game

think_of_number The task starts now. **Please think of a whole number between 1 and 5**, i.e., 1, 2, 3, 4, or 5, and keep it in your mind.

Do you have a number in your mind now?

- ○ Yes (1)
- ○ No (2)

---

remember Before you go to the next page, please ensure that you have this number in mind and try not to forget it.

Page Break

match Now, please go to the website linked below. The website may or may not already show you a number that it picks randomly from 1 to 5. **Regardless of whether there is a number already or not, please click "Go" *once and only once* to generate a number.**

https://numbergenerator.org/randomnumbergenerator/1-5

Is the regenerated number the same as what you have in mind (that is, you obtained a match)?

- ○ Yes, I obtained a match. (1)
- ○ No, I did not obtain a match. (0)

End of Block: mind game

Start of Block: empirical expectation

ee Of 100 Prolific participants who **did not obtain a match**, how many do you believe **will nevertheless report a match**? Please indicate a whole number between 0 and 100.

_____

End of Block: empirical expectation

Start of Block: personal normative belief

pn Regarding the task that you just completed:

In your own opinion (and independent of the opinion of others), in that task, **how appropriate is it to report a match without actually obtaining one**?

Here "appropriate" means what you personally consider to be "correct" or "ethical."

- ○ Very Inappropriate (1)
- ○ Inappropriate (2)
- ○ Somewhat Inappropriate (3)
- ○ Somewhat Appropriate (4)
- ○ Appropriate (5)
- ○ Very Appropriate (6)

End of Block: personal normative belief

Start of Block: normative expectation

ne **This is the second opportunity to earn a bonus payment.**

Regarding the task that you just completed:

In that task, **how socially appropriate is it to report a match without actually obtaining one**?

Here "socially appropriate" means what **most people** would agree to be "correct" or "ethical," independent of what you think yourself.

You receive a bonus of 0.4 GBP if your response is the **most common response** from participants in this study. For example, if you choose "very socially appropriate" below, and more participants are choosing this than any other response option, you receive 0.4 GBP. Therefore, it is in your interest to choose what most others would choose.

- ○ Very Socially Inappropriate (1)
- ○ Socially Inappropriate (2)
- ○ Somewhat Socially Inappropriate (3)
- ○ Somewhat Socially Appropriate (4)
- ○ Socially Appropriate (5)
- ○ Very Socially Appropriate (6)

End of Block: normative expectation

Start of Block: hypothetical situation description

hypo_desc1 Now, please consider a Prolific participant who is taking part **in the same task that you took part in at the beginning** of this study.

For your reference, below are the instructions of the task:

Display This Question:

If condition = baseline

baseline_desc

You will think of a number between 1 and 5 and keep it in mind. Then, you will go to an external website that will show you a number from 1 to 5 that it picks randomly. All you need to do is

indicate whether the number the website shows is the same as the one you have in mind. If you say yes, you are reporting a match.

If you report a match, you receive 1.2 GBP from the task. If you do not report a match, you receive 0.2 GBP.

Display This Question:

If condition = cp

cp_desc

You will think of a number between 1 and 5 and keep it in mind. Then, you will go to an external website that will show you a number from 1 to 5 that it picks randomly. All you need to do is indicate whether the number the website shows is the same as the one you have in mind. If you say yes, you are reporting a match.

If you report a match, you receive 1.4 GBP from the task. If you do not report a match, you receive 0.2 GBP.

Given the nature of the task, it is very unlikely that out of 500 participants, more than 25% (that is, 125 out of 500) will obtain a match. If more than 25% report a match, this is likely due to some participants reporting a match when they did not obtain one. In this case, we will reduce the payment for all participants, irrespective of whether a match is reported. In particular, if more than 25% of participants report a match, all participants will lose 0.2 GBP. That is, in this case, if you report a match, you receive 1.2 GBP; if you do not report a match, you receive 0 GBP.

Display This Question:

If condition = norm

norm_desc

You will think of a number between 1 and 5 and keep it in mind. Then, you will go to an external website that will show you a number from 1 to 5 that it picks randomly. All you need to do is indicate whether the number the website shows is the same as the one you have in mind. If you say yes, you are reporting a match.

If you report a match, you receive 1.4 GBP from the task. If you do not report a match, you receive 0.2 GBP.

Given the nature of the task, it is very unlikely that out of 500 participants, more than 25% (that is, 125 out of 500) will obtain a match. If more than 25% report a match, this is likely due to some participants reporting a match when they did not obtain one.

hypo_desc2 Imagine that this participant knows **how their co-participants (that is, those who take part in the same study together with this participant) have responded**. In other words, this participant has **true and reliable information** about what percentages of others in the task have reported a match.

You can think of it also in this way: **this participant is the last one to take part in the study and has some degree of access to the responses made by all previous participants** (around 500 of them).

On the following pages, we will ask about **the situation this hypothetical participant is in**.

○ I have read and understood the above. (1)

End of Block: hypothetical situation description

Start of Block: conditional empirical expectations

cee_intro Below you will indicate **how likely** a Prolific participant will **report a match without getting one in different hypothetical situations like the one described to you**.

Particularly, you will assume that this participant knows that a certain percentage of his or her co-participants (i.e., those taking part in the task together) have reported a match.

You will respond by providing a number between 0 and 100 (inclusive). For example, if your response is 50, it means you believe that out of 100 Prolific participants, 50 will report a match without getting one when they are in the hypothetical situation.

*

cee_1 Out of 100 Prolific participants, how many will report a match without getting one when they know that **between 0% to 10% of co-participants** have reported a match?

_____

*

cee_2 Out of 100 Prolific participants, how many will report a match without getting one when they know that **between 10% to 20% of co-participants** have reported a match?

_____

*

cee_3 Out of 100 Prolific participants, how many will report a match without getting one when they know that **between 20% to 30% of co-participants** have reported a match?

_____

*

cee_4 Out of 100 Prolific participants, how many will report a match without getting one when they know that **between 30% to 40% of co-participants** have reported a match?

_____

*

cee_5 Out of 100 Prolific participants, how many will report a match without getting one when they know that **between 40% to 50% of co-participants** have reported a match?

_____

End of Block: conditional empirical expectations

Start of Block: conditional personal normative beliefs

cpn_intro Below you will indicate **how appropriate** it is for a participant to **report a match without getting one in different hypothetical situations like the one described to you**.

Particularly, you will assume that this participant knows that a certain percentage of his or her co-participants (i.e., those taking part in the task together) have reported a match.

Here "appropriate" means what you personally consider to be "correct" or "ethical" independent of the opinion of others.

cpn_1 How appropriate is it for a participant to report a match when this participant knows that **between 0% to 10% of co-participants** have reported a match?

- ○ Very Inappropriate (1)
- ○ Inappropriate (2)
- ○ Somewhat Inappropriate (3)
- ○ Somewhat Appropriate (4)
- ○ Appropriate (5)
- ○ Very Appropriate (6)

cpn_2 How appropriate is it for a participant to report a match when this participant knows that **between 10% to 20% of co-participants** have reported a match?

- ○ Very Inappropriate (1)
- ○ Inappropriate (2)
- ○ Somewhat Inappropriate (3)
- ○ Somewhat Appropriate (4)
- ○ Appropriate (5)
- ○ Very Appropriate (6)

cpn_3 How appropriate is it for a participant to report a match when this participant knows that **between 20% to 30% of co-participants** have reported a match?

- Very Inappropriate (1)
- Inappropriate (2)
- Somewhat Inappropriate (3)
- Somewhat Appropriate (4)
- Appropriate (5)
- Very Appropriate (6)

cpn_4 How appropriate is it for a participant to report a match when this participant knows that **between 30% to 40% of co-participants** have reported a match?

- Very Inappropriate (1)
- Inappropriate (2)
- Somewhat Inappropriate (3)
- Somewhat Appropriate (4)
- Appropriate (5)
- Very Appropriate (6)

cpn_5 How appropriate is it for a participant to report a match when this participant knows that **between 40% to 50% of co-participants** have reported a match?

- ○ Very Inappropriate (1)
- ○ Inappropriate (2)
- ○ Somewhat Inappropriate (3)
- ○ Somewhat Appropriate (4)
- ○ Appropriate (5)
- ○ Very Appropriate (6)

End of Block: conditional personal normative beliefs

Start of Block: conditional normative expectations

cne_intro Below you will indicate **how socially appropriate** it is for a participant to **report a match without getting one in different hypothetical situations like the one described to you**.

Particularly, you will assume that this participant knows that a certain percentage of his or her co-participants (i.e., those taking part in the task together) have reported a match.

Here "socially appropriate" means what **most people** would agree to be "correct" or "ethical" independent of what you think yourself.

This is the third opportunity to earn a bonus payment. We will randomly select one question from the five that you will answer below. If for this randomly selected question, your response is the most common response from participants in this study, you receive 0.4 GBP. Therefore, it is in your interest to choose what most other participants would choose.

cne_1 How socially appropriate is it for a participant to report a match when this participant knows that **between 0% to 10% of co-participants** have reported a match?

- ○ Very Socially Inappropriate (1)
- ○ Socially Inappropriate (2)
- ○ Somewhat Socially Inappropriate (3)
- ○ Somewhat Socially Appropriate (4)
- ○ Socially Appropriate (5)
- ○ Very Socially Appropriate (6)

cne_2 How socially appropriate is it for a participant to report a match when this participant knows that **between 10% to 20% of co-participants** have reported a match?

- ○ Very Socially Inappropriate (1)
- ○ Socially Inappropriate (2)
- ○ Somewhat Socially Inappropriate (3)
- ○ Somewhat Socially Appropriate (4)
- ○ Socially Appropriate (5)
- ○ Very Socially Appropriate (6)

cne_3 How socially appropriate is it for a participant to report a match when this participant knows that **between 20% to 30% of co-participants** have reported a match?

- ○ Very Socially Inappropriate (1)
- ○ Socially Inappropriate (2)
- ○ Somewhat Socially Inappropriate (3)
- ○ Somewhat Socially Appropriate (4)
- ○ Socially Appropriate (5)
- ○ Very Socially Appropriate (6)

cne_4 How socially appropriate is it for a participant to report a match when this participant knows that **between 30% to 40% of co-participants** have reported a match?

- ○ Very Socially Inappropriate (1)
- ○ Socially Inappropriate (2)
- ○ Somewhat Socially Inappropriate (3)
- ○ Somewhat Socially Appropriate (4)
- ○ Socially Appropriate (5)
- ○ Very Socially Appropriate (6)

cne_5 How socially appropriate is it for a participant to report a match when this participant knows that **between 40% to 50% of co-participants** have reported a match?

- Very Socially Inappropriate (1)
- Socially Inappropriate (2)
- Somewhat Socially Inappropriate (3)
- Somewhat Socially Appropriate (4)
- Socially Appropriate (5)
- Very Socially Appropriate (6)
