consent

Consent Form **Purpose of the study** This study is conducted by researchers at the University of Vienna and the University of Copenhagen. We aim to understand how people make and evaluate decisions in different social situations. **Procedure** You will follow the instructions in this survey and respond accordingly. The estimated duration of this study has been indicated on the online platform from which you started this study. **Potential risks** This study carries no more risk than those of ordinary daily lives. It aims to contribute to existing research in social psychology and behavioural science. We also hope this study offers you an opportunity to participate in psychological research and possibly learn more about yourself, including your beliefs, evaluations, and preferences. **Compensation** Your compensation will be offered through Prolific. It will include a guaranteed flat fee, payable only if you complete the entire study, as well as a bonus payment. The amount of this bonus depends on your responses. **Confidentiality** The data collected for this study will be shared with other researchers for research-only purposes after all personal identifiers are removed. Your responses will be anonymous in the dataset. **Participation and withdrawal** Your participation is voluntary. This means you can stop at any time without negative consequences, except for any impact on your compensation. **Questions and concerns** If you have any questions or concerns about this research, please contact Qinyu Xiao at the University of Vienna (qinyu.xiao@univie.ac.at). **Please indicate whether you have read and understood the above and whether you agree to participate.**

- ○ I have read and understood the above. I agree to participate. (1)
- ○ I do not consent to participate. (2)

End of Block: consent

intro **Introduction** Thank you for taking part in our study. During this study, you will have **two opportunities to earn a bonus payment**. How much you earn depends on your responses. Therefore, please pay close attention to the instructions. After the study is completed, **one of the two bonuses will be randomly chosen by the computer for payout**. You will receive the bonus via Prolific a few days after the study is finished. **Please note that you will be part of a group of around 1,000 participants completing this study alongside you.** We emphasise that all information we give you about this task and your payment is accurate. This study does not require lengthy open-ended responses; however, there will be a few brief ones. Please do not use external sources or tools to assist with completing the survey unless you are instructed to do so. Your responses can be brief, and we appreciate genuine, personal experiences and thoughts.

- ○ I have read and understood the above. I am ready to proceed. (1)

mg_des_gen **This is your first opportunity to earn a bonus.** You will complete the following task: You will be asked to pick a whole number between 1 and 5 (that is, 1, 2, 3, 4, or 5) and

keep it only in your mind. After that, you will go to a website. The website will show you a number from 1 to 5 that it selects randomly. All you need to do is indicate whether the number the website shows you is the same as the one you picked. If you report that the number you kept in mind is the same as the number shown by the website, we call this **reporting a match**.

Display this question:

If condition = baseline

mg_des_baseline If you report a match, you receive £1.00 from this task. If you do not report a match, you receive £0.20.

Display this question:

If condition = cp

mg_des_cp If you report a match, you receive £1.20 from this task. If you do not report a match, you receive £0.20. **We expect you to follow the rule of this task and report truthfully**. You should report a match if, and only if, you actually obtain one. As mentioned earlier, you are part of a group of around 1,000 participants completing this task. Given how the task works, it is very unlikely that more than 25% of this group will obtain a match. If more than 25% report a match, this is likely due to **some participants breaking the rule and reporting a match when they did not obtain one**. If that happens, we will impose a punishment that reduces the payment for all participants. **Specifically, if more than 25% of participants in your group report a match, all of you will lose £0.20, irrespective of whether a match was reported or not.** So in that case, if you report a match, you receive £1.00; if you do not report a match, you receive £0.00.

Display this question:

If condition = norm

mg_des_norm If you report a match, you receive £1.20 from this task. If you do not report a match, you receive £0.20. **We expect you to follow the rule of this task and report truthfully**. You should report a match if, and only if, you actually obtain one. As mentioned earlier, you are part of a group of around 1,000 participants completing this task. Given how the task works, it is very unlikely that more than 25% of this group will obtain a match. If more than 25% report a match, this is likely due to **some participants breaking the rule and reporting a match when they did not obtain one**.

mg_des_proceed Please read the above carefully before going to the next page. We will ask a few questions to make sure that you understand the task.

- ○ I understand the task well. I'd like to proceed. (1)

JS

mg_c_intro Please answer the following questions about the task. You can proceed only after you have answered all of them correctly.

*

mg_c1 Those who report a match will receive a larger bonus for this task than those who do not.

- ○ True (1)
- ○ False (2)

Display this question:
If condition = baseline

*

mg_c2 My bonus payment for this task depends only on whether I report a match.

- ○ True (1)
- ○ False (2)

Display this question:

If condition = cp

Or condition = norm

*

mg_c3 It is very unlikely that more than 25% of the participants in my group will obtain a match simply by chance.

- True (1)
- False (2)

Display this question:

If condition = cp

*

mg_c4t My bonus payment will be negatively affected if too many other participants report a match, regardless of whether I report a match or not.

- True (1)
- False (2)

Display this question:

If condition = norm

*

mg_c4f My bonus payment will be negatively affected if too many other participants report a match, regardless of whether I report a match or not.

- True (1)
- False (2)

Display this question:

If condition = cp

*

mg_c5 If more than 25% of the participants in my group report a match, only those who report a match will lose £0.20.

- True (1)
- False (2)

Display this question:

If condition = baseline

*

mg_c6 If I do not report a match, I will receive a larger bonus for this task than if I report one.

- True (1)
- False (2)

ne Regarding the task that you just completed: In this task, **how socially appropriate is it to report a match without actually obtaining one?** Here, “socially appropriate” means what **most people** would agree is “correct” or “ethical,” independent of what you think yourself. **This is your second opportunity to earn a bonus payment**. You will receive a bonus of £0.40 **if your response is the most common response within the group of participants**

that complete the task alongside you. In other words, whichever response option you choose below, if more participants in your group choose this option than any other option, you will receive £0.40 for this question. It is thus in your interest to **choose what you think most people would choose**.

- ○ Very socially **inappropriate** (1)
- ○ Socially **inappropriate** (2)
- ○ Somewhat socially **inappropriate** (3)
- ○ Somewhat socially **appropriate** (4)
- ○ Socially **appropriate** (5)
- ○ Very socially **appropriate** (6)
